

CARLOS AUGUSTO

Data Analyst

ABOUT ME

Data Specialist with more than 6 years of experience in Power BI, Python, SQL and Machine Learning, focused on transforming complex data into strategic insights. Expert in scalable analytical solutions, automation and data storytelling, with strong experience in digital transformation projects, automated pipelines and predictive analyzes that drive business results.

EDUCATION

Estacio de Sá

Bachelor's Degree in Information Systems | 2020- 2023

Dio

Postgraduate Specialization - MBA | 2023-2026

LANGUAGES

- Espanhol (Advanced)
- English (Advanced)

PROFICIENCY

- Data Analysis
- Data Engineering
- Data Science

+55 (31) 99986-2641

EXPERIENCES

Full Business Intelligence Analyst

NeooH | Feb 2025 - Current

- Financial Analysis and BI: Transforming complex financial data into strategic insights, using Power BI, DAX, statistical modeling and machine learning to optimize forecasts and financial decisions.
- Financial Report Optimization: Development of dynamic dashboards for KPI analysis, budget planning, cash flow and profitability.
- Collaboration and Communication: Interface with financial and executive teams to translate needs into analytical solutions, presenting strategic insights for decision making.

Data Analyst PI

Alvorada Ambiental | Sep 2023 - Feb 2025

- Leadership in predictive and diagnostic analysis using Python, R and DAX to generate high-impact insights.
- Development of dashboards with Power BI, linked to APIs for real-time updates, supporting strategic decisions.
- Implementation of solutions in Google Cloud and AWS, integrating databases and optimizing complex queries for high performance.
- Collaboration with executive teams to align analyses with strategic objectives.

Software Analyst

RapidoNet Sistemas e Automação LTDA | Jan 2023 - Sep 2023

- Data automation projects with SQL Server, integrating analytical solutions directly into operational systems.
- Application of statistical algorithms for efficiency analysis and forecasts, improving decision making.
- Optimization of internal processes through data analysis and customized reports.

Junior Data Analyst

123milhas | Feb 2022 - Dec 2022

- Building complex data pipelines using Power BI and SQL, reducing analysis time by 30%.
- Implementation of high-impact dashboards for monitoring KPIs, improving the assertiveness of business strategies.
- Continuous monitoring of indicators, providing detailed insights to support senior management.

IT Technician in Systems

123milhas | Mar 2021 - Feb 2022

- Automation of manual processes via JavaScript, increasing operational efficiency by 25%.
- Development of advanced reports with DAX and Power BI to support the operations team.
- Management of critical IT infrastructure and integration with internal systems.

IT Intern

Premium Health | May 2019 - Mar 2021

- Development of scripts in Node.js and advanced reports in SQL Server, generating strategic insights for operations.
- Collaboration with cross-functional teams to develop solutions that increased the efficiency of internal processes.

CERTIFICATIONS

- **Google Data Analytics Professional Certificate**
September 2023 - Does not expire
Certificate of completion - Google - 6 months at 10 hours per week
- **Potência Tech powered by Ifood | Data Sciences with Python**
Junho de 2023 - Does not expire
Certificate of completion - Dio Pro - hour(s).
- **Microsoft Power BI para Business Inteligente e Data Science**
Junho de 2023 - Does not expire
Certificate of completion - Data Science Academy - 72 hour(s).
- **Linguagem Python para Análise de Dados e Data Science**
Junho de 2023 - Does not expire
Certificate of completion - Data Science Academy - 72 hour(s).
- **Data Analysis Using Python**
Janeiro de 2024 - Does not expire
Certificate of completion - IBM - 70 hour(s).
- **Artificial Intelligence Fundamentals**
Maio de 2023 - Does not expire
Certificate of completion - Data Science Academy - 12 hour(s).
- **Machine Learning - Dimensionality Reduction**
Fevereiro de 2024 - Does not expire
Certificate of completion - IBM - 60 hour(s).
- **Data analysis with R programming**
Setembro de 2023 - Does not expire
Certificate of completion - Google - 37 hour(s).
- **SQL**
Julho de 2022 - Does not expire
Certificate of completion - Softblue - 20 hour(s).
- **Statistics**
Agosto de 2023 - Does not expire
Certificate of completion - Mec - 30 hour(s).
- **CSS3**
Junho de 2021 - Does not expire
Certificate of completion - Fundação Bradesco - 26 hour(s).
- **Programming Logic**
Dezembro de 2022 - Does not expire
Certificate of completion - Softblue - 20 hour(s).
- **Javascript Developer**
Junho de 2023 - Does not expire
Certificate of completion - Dio Pro - 40 hour(s).
- **Java**
Maio de 2023 - Does not expire
Certificate of completion - Softblue - 60 hour(s).

SKILLS

- **Languages:** Python, R, SQL, DAX, JavaScript, Java.
- **Tools:** Power BI, Google Cloud, SQL Server, Looker Studio, TensorFlow, Scikit-learn, Azure, AWS.
- **Skills:** ETL, Data Modeling, Machine Learning, Data Visualization, Process Automation, Relational and Non-Relational Databases.

PROJECTS

- **Financial Automation:** Development of an automated financial dashboard with Power BI and integration with APIs, reducing 40% of manual update time.
- **Sales Analysis:** Implementation of a predictive model in Python for sales forecasting, increasing assertiveness by 20%.
- **Scalable Data Pipeline:** Creation of an ETL pipeline in Google Cloud, integrating real-time data sources and improving operational efficiency.
- **Digital Marketing Dashboard:** Analytical panel for monitoring campaigns, positively impacting strategic decisions in the sector.

PROFESSIONAL HIGHLIGHTS

- **Creation of Analytical Solutions:** Development of dynamic dashboards and interactive reports with real-time updates, optimizing decision processes and increasing operational efficiency.
- **Data Integration and Modeling:** Experience in ETL pipelines and data integration with cloud servers (Google Cloud and Azure), APIs and relational/non-relational databases.
- **Machine Learning and AI:** Implementation of predictive models and supervised and unsupervised learning algorithms, focusing on neural networks and decision trees.
- **Storytelling with Data:** Clear, visually impactful communication of insights to executive teams and stakeholders.
